5 Thin Stone Designs in

1cm

POLYCOR

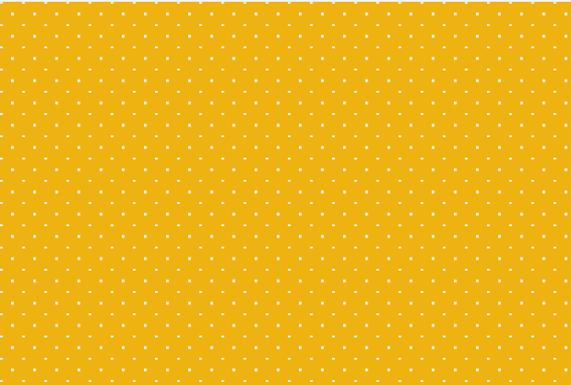

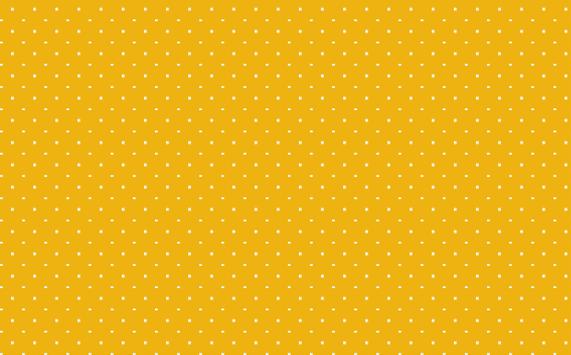

Ancient Material, Modern Cut

Designers are using natural stone in new ways in both commercial and residential installations thanks to technology that reduces weight and improves strength and versatility of marble and granite.

All of the designs here feature Polycor's composite backed Ultra-Thin 1 cm Stone. The 1 cm slab is a lighter, stronger cut that is applicable for both modern and traditional designs.

Granite cabinetry designed for Baccarat's flagship store in Manhattan by Justin Capuco of Rafael de Cárdenas / Architecture At Large

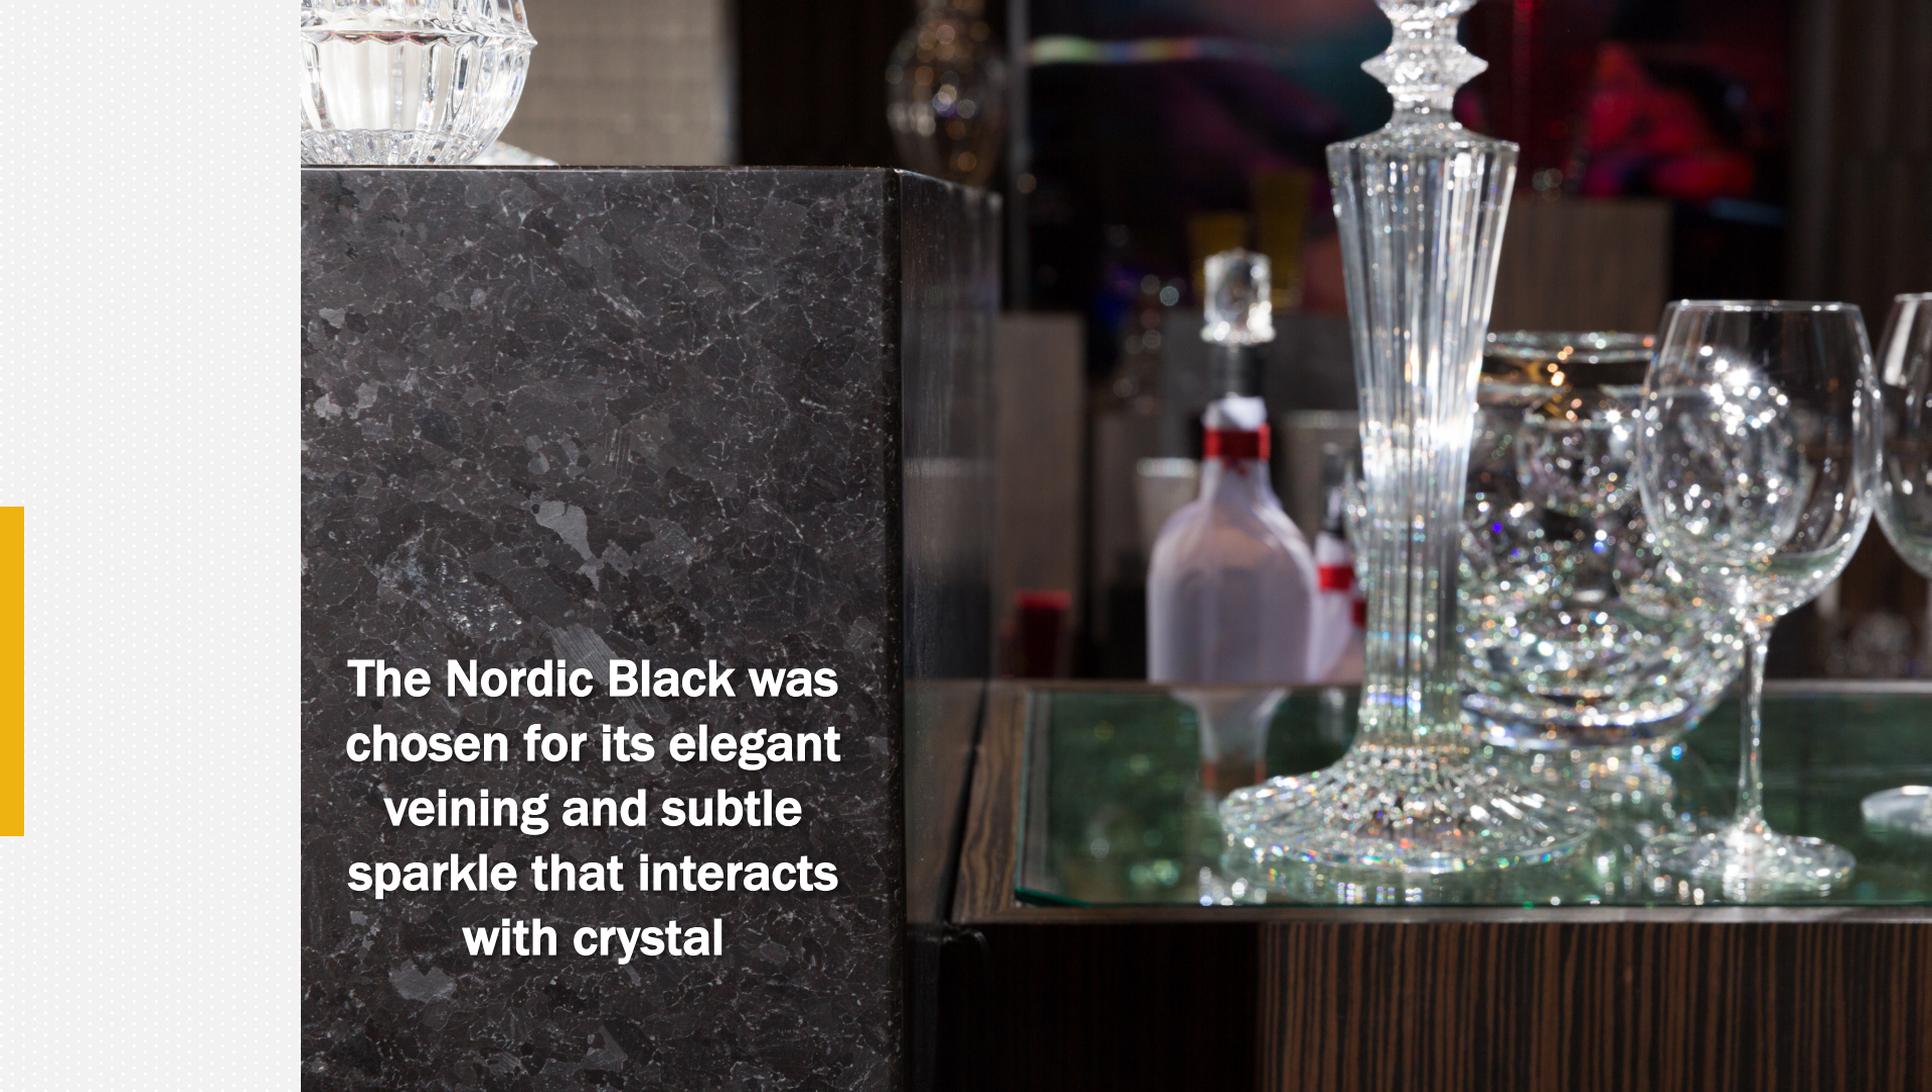

1

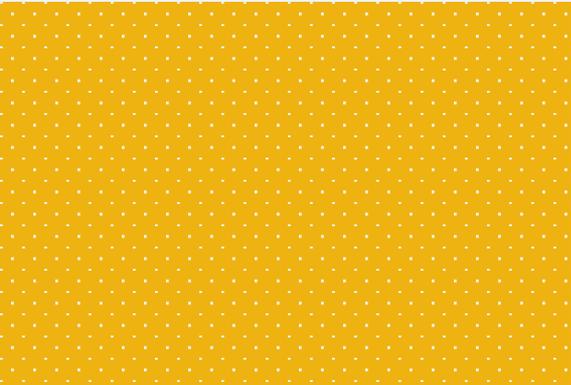

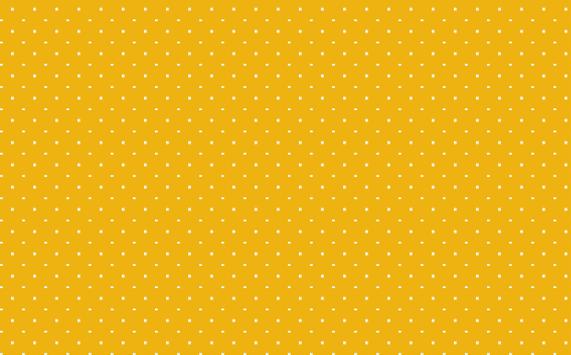

The Retail Display

Movable plinth with mitered corners
constructed from Ultra-Thin 1 cm Nordic
Black antiqued granite at Baccarat

**The Nordic Black was
chosen for its elegant
veining and subtle
sparkle that interacts
with crystal**

2

The Modern Fireplace

Design by Jessica Boily.

Seamless Construction

1 cm thin slabs of antiqued Saint Henry granite from Polycor through Cosentino.

Design by Jessica Boily.

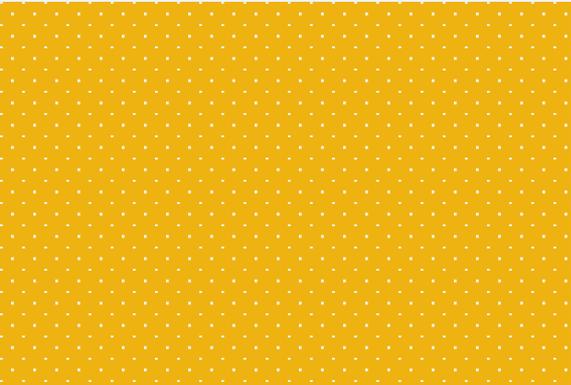

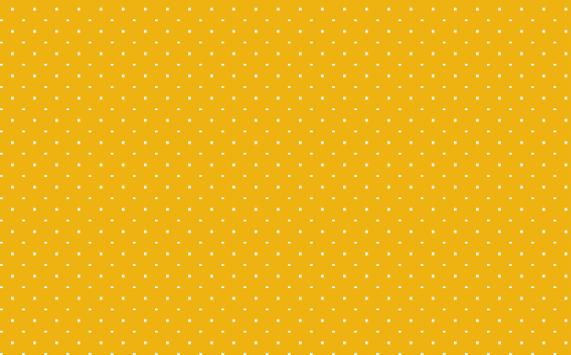

Fabrication by Mountain Granite.

The Bookmatched Bathroom

**Bookmatched
Calacatta
Extra marble
provides a
stunning
backdrop to
this floating
honed granite
counter**

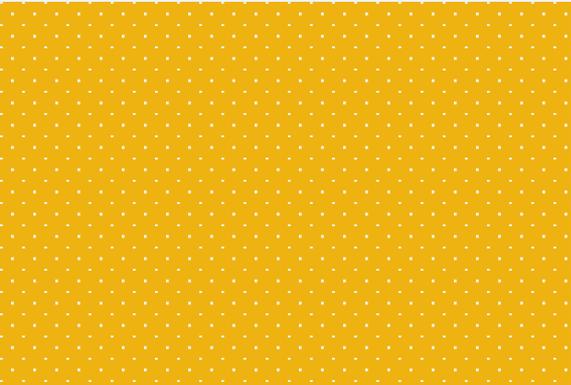

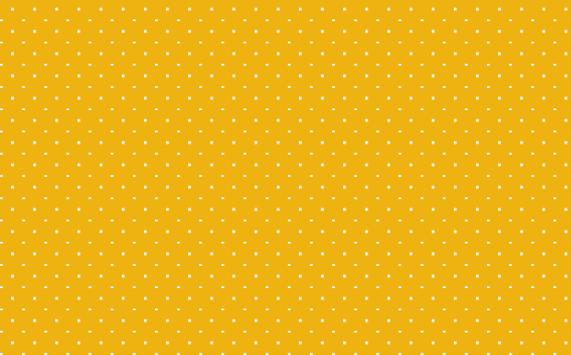

Design by Aria Stone Gallery

The counter appears as a solid block of stone but is actually 1 cm Ultra-Thin slabs of Cambrian Black **honed** granite, mitered over a plywood substrate

4

The Waterfall Island

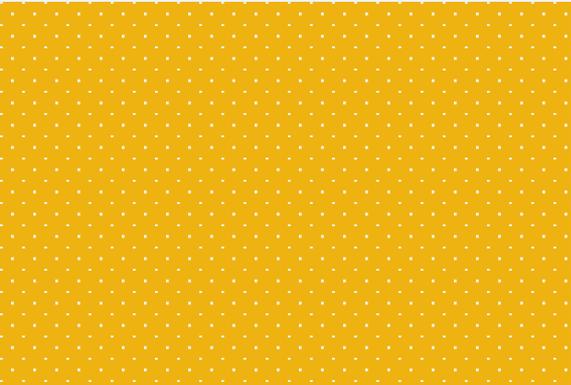

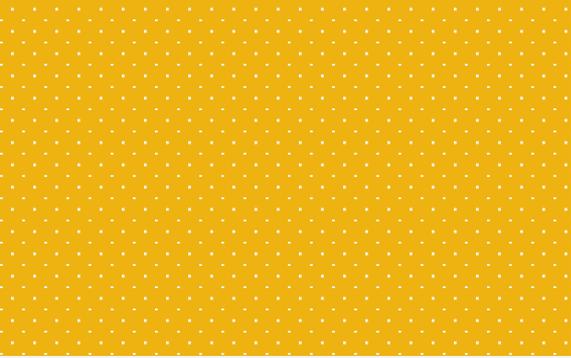

Ultra-thin
polished
Cambrian Black
granite tops warm
wood cabinetry
for a glamorous
waterfall island

The 1 cm surface features mitered ends and a honed finish.

Visible from adjacent rooms, the waterfall upholds a modern aesthetic throughout the space, without competing with the cabinetry.

5

The Modern Office

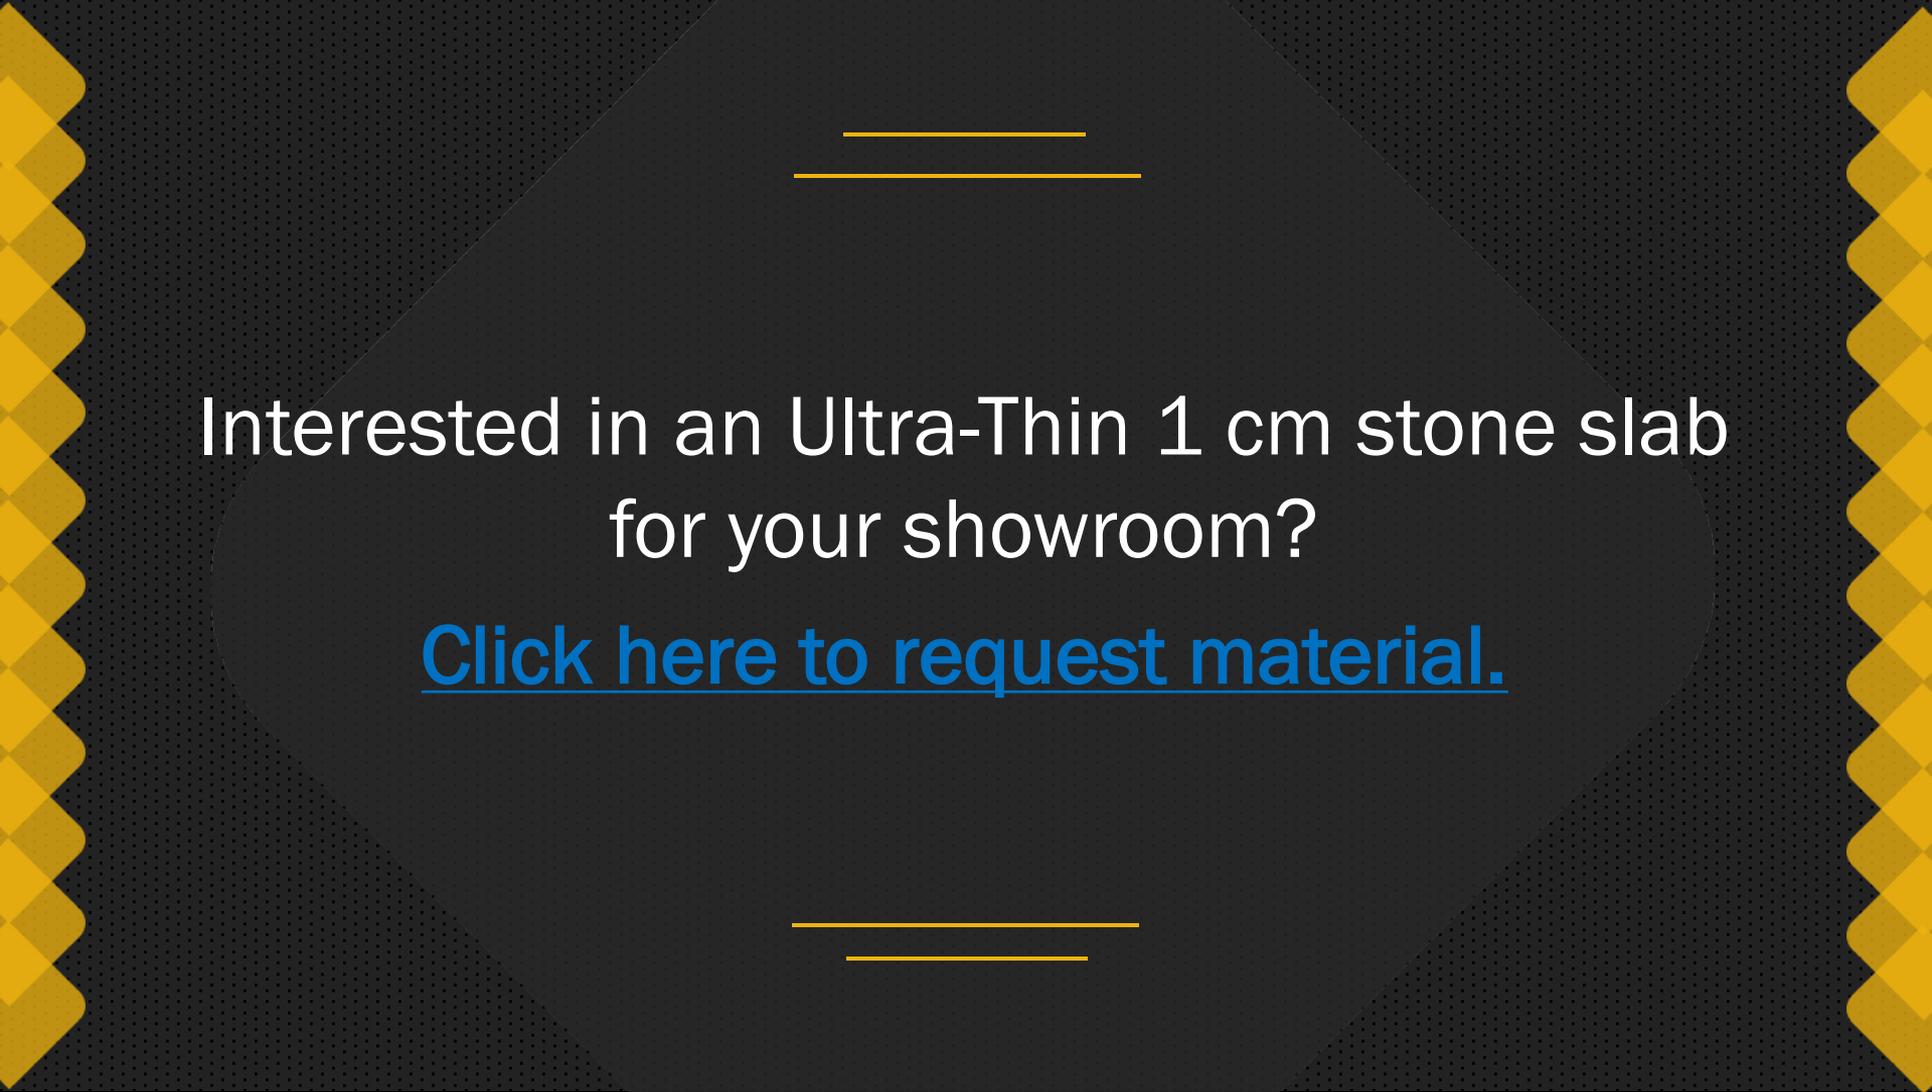

Integrated desk

This desk in the HG Stone Gallery in NYC not only looks weightless, the stone actually weighs a third of traditional 3 cm slabs, but with 10 times the strength.

The Pearl Grey marble pieces were matched to give a continuous flow to the stone's veining
